

PRODUCT EXPERIENCE

Faber Worldwide

Faber Factory - Fabriano, Italy

Since 1955, Faber has been known for its innovation, technology, quality and service. Today, it's the worldwide leading cooker hood manufacturer. Headquartered in Fabriano, Italy, Faber has a turnover of 220 million Euros.

Innovation: Faber has been inventing and patenting unique and user friendly technologies for kitchen hoods like baffle filter, silent kit, exquisite designs, hybrid hoods, electronic systems and air conditioner hoods. Faber range hoods were awarded "ADEX Award" in 2011 from thousands of entries, based on criteria like form, function and fitness.

Competency: Faber is a world leader in manufacturing technologies like automation & robotics with focus not only on aesthetics but also quality and safety of each unit produced.

Quality Systems: Faber is the 1st company in the hood sector worldwide to be certified as corresponding to the ISO 9001 standard since 1994. Faber has received the SGS Excellence Certificate "THE EXCELLENCE CERTIFICATE-No.1" for its quality standards.

Our History:

We invented the kitchen hood in a small workshop.

For fifty years we conceptualized, designed and manufactured hoods that are unique in their production and technology. For this reason, in

Italy, one hood out of two is a Faber hood.

Our presence in 8 Nations of 3 Continents is just a small example of our vast influence and growth.

We transformed the range hood from a simple built-in element to a beautiful and functional appliance.

Our products are the goal of our technology, our design criterion, the parameter of our quality.

Our Strength:

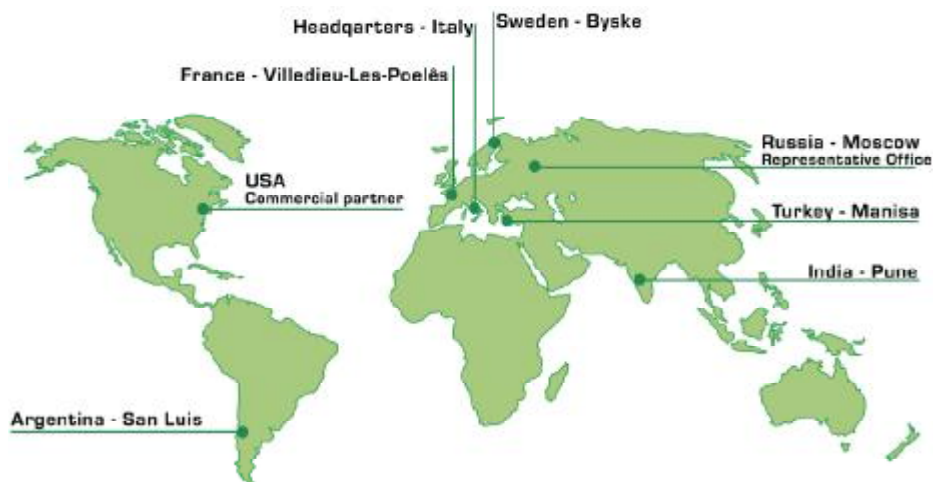

The corporate identity of Faber is based on the consistency between our vision and our values.

Our identity is our first and most important asset. In it converge strong commitment, courageous decisions, passion and dynamism that each one of us expresses every day.

The tangible results of our identity are visible in the design, the technology and the innovation of our products.

Our hoods are beautiful, ergonomic, effective and quiet.

Our hoods make what we promise to offer: clean air in your kitchen.

Facts & Figures	• Presence in over 15 countries	• 1,350 employees*
	*FY 2010	• Sales - 2,6 mn hoods pa

Faber New Factory - Pune

FFIL is India's leading kitchen appliances manufacturer with Swiss and Italian parentage for "Franke" and "Faber" brands respectively.

Franke Faber India Limited is part of the 2.5 billion USD Franke Artemis Group. Franke Artemis Group has business interests in Kitchen Systems, Food Service, Coffee Systems, Beverage Systems & Washroom Systems and is present in over 70 countries.

With its headquarters in Pune, the Franke Faber India Limited has completed 16 years of its Indian journey. Both the brands command a niche and operate as independent entities.

While FFIL sells Sinks, taps, accessories and bio water disposers under the "FRANKE" brand, it sells Hoods, Hobs, Cooktops, Cooking range, Built-In Ovens and Dishwashers under the "FABER" brand.

Over 250 employees produce more than 300 products in the Pune plant with current production capacity of 150,000 hoods, 100,000 hobs and 50,000 other kitchen appliances per annum.

FABER has over 2,000 retail counters for sales and service across the country.

A crucial element is to establish a long-term presence in India. The company has made an initial investment of Rs. 50 crore in its new manufacturing plant in Sanaswadi, Pune. This investment is the biggest the group has made outside Europe so far. The new plant will meet the global standards of FABER. The plant will use futuristically designed equipment and will be the export hub for the Asia Pacific and Middle East regions.

FABER is also planning to relocate one of its R&D bases from Europe to India by 2012.

VISION

To develop and to promote products and technologies in accordance to our recognized know-how in air treatment, following the principles of design and functionality every time.

MISSION

- To be the recognized and appreciated leader in the sector of kitchen air treatment.
- To offer solutions in which aesthetics and practice of use are always combined.
- To be the ideal partner to our customers: expert, reliable, innovative, problem-solver.
- To maintain the maximum attention to issues concerning Quality, Safety and Environment.

TECHNOLOGY LEADERSHIP

Sil-K Technology That Brings You Silence

The Sil-K Route To World Class Kitchens!

The Silence Key (Sil-K) technology brought to you exclusively by Faber in India, makes your kitchen 16 times quieter!

- Sil-K-xp: Reduces hood sound by 12 db(A)
- 16 hoods equipped with Sil-K-xp make the same noise as 1 hood without it.
- Uses aeronautical engineering principles
- Sound emissions from diffuser and filters are almost eliminated

Faber Chimneys / Hoods - Sunzi Technology

FABER Chimneys / Hoods:

Superior air cleaning mechanism and users friendly electronic controls

FABER Launches its new Hoods Series "Sunzi" SUNZI CONTROLS Functions - Pictures

N °of buttons : 4

Visual indicator : 1 led bi-color

K40 – SQUARE MOTOR
3 speeds (2+I)

Push once	0/1	2	3	ON/OFF light
Push 1 sec.	NO	NO	NO	NO

PRO/EBM – ROUND MOTOR
3 speeds (2+I)

ENERGY– ROUND MOTOR
4 speeds (3+I)

Push once	0/1	2	3	ON/OFF light
Push 1 sec.	NO	NO	I	NO

I: intensive max speed for 10 min. then back to previous speed

New component USPs

- Soft touch
- Bi-color LED on user interface
- Great feeling for the user
- Better cleaning
- Outage-proof
- Suitable for use with whole range of Faber motor

F-light generation

Design&Function: F-Light is here, the new generation of lamp hoods

Cooker hood and pendant light in a single product: when the hood function is activated the motor gently comes down over the hob and comes up as soon as the cooking is finished, to be enclosed within the elegant pendant light again

TECHNOLOGY LEADERSHIP

Zero clogging - Effective suction and avoids overloading of motor.

Easy to Clean
Hassle free maintenance

Saves Electricity
Zero clogging ensures efficient suction even at lower speeds.

Cut and chop technology
Separates Oil, Water vapor, spices from the smoke and collects them in the stainless steel strips and extracts odour effectively

Constructed from Stainless steel
Filter to last a Lifetime hence **no replacement cost.**

FABER 3 LAYER BAFFLE FILTER

Patented Faber Baffle Filter designed for Indian oily cooking

BAFFLE FILTERS (PAT) 90% EFFICIENCY

- Ensuring OVER 90%* efficiency, baffle filters create an impenetrable barrier for grease.
- With a patented Faber design, these filters have been devised so that vapours have to suddenly chop and change direction, thereby separating the grease particles and making extraction as quiet as possible.

- The baffle filters are made of STAINLESS STEEL, making them extremely hard-wearing and giving the hood a very professional appearance.

In Addition : They are easily cleaned in the dishwasher or washed by hand.

(*On the basis of the norm IEC 6159).

FABER Hybrid Hoods:

Triple Ring Burner

This is a special purpose Burner provided in select models of Faber Cooking ranges. This Triple Ring Burner is specially provided to produce three concentric flame rings ideal for work cooking and preparing chapatis as it generates uniform heat at the centre and around the base of large pans or tavas. All burners are ISO 9001 certified and their performance in terms of efficiency and emission of carbon monoxide is exceptional.
